Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/638,404	Applicant(s) ECKSTEIN ET AL.	
	Examiner Andrew M. Gilbert	Art Unit 3767	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Acknowledgements

1. This office action is in response to the reply filed on 12/29/2006.
2. In the reply, the Applicant amended claims 1, 2, 3, 5, 6-8, 10-11, 16-19; cancelled claim 20; and added new claims 21-22.
3. The Applicant filed formal drawing to obviate the previous objection to the drawings.
4. The Examiner previously indicated claims 19 and 20 as being allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. However, the Applicant cancelled claim 20 and did not amend 19 to include all limitations of the base claim and any intervening claims. Thus, the previous indication is moot.
5. The Applicant's amendment of claim 19 into independent format not required the subject matter of independent claim 1 sufficiently broadens the scope of the claim so as to require an election/restriction before continuation of prosecution. The newly claimed subject matter is outside of the scope of the invention searched in the previous office action.
6. Claims 1-3, 5-19, 21-22 are pending for examination.

Election/Restrictions

7. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-3, 5-18, drawn to a motorized syringe having a housing having a first section having an expansible-contractible chamber, and a second

section having an electrical drive motor of the drive system, the first and second sections being interconnected at their ends, and a power supply separate from the housing, classified in class 604, subclass 153.

- II. Claims 19, 21-22, drawn to a method of delivering a drug preparation into a subject's body comprising introducing to a vagina of a female a motorized syringe containing a semen preparation in an expansible-contractible chamber, introducing a flexible catheter tube connect to said syringe, and energizing said motorized syringe to deliver said semen preparation to the uterus at a slow rate for a prolonged period of time measured in hours, classified in class 604, subclass 515.

The inventions are distinct, each from the other because of the following reasons:

8. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as multiple-injections into any area of the human body.
9. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew M. Gilbert whose telephone number is (571)
